# Cooking with cast iron

Cooking has now become a true art of healthy living, on which to try your hand every day with your family or to share special moments with friends.

Our products are an excellent compromise between tradition and modernity thanks to the properties of cast iron and the refinement of the enamelling.

Enamelled cast iron is one of the best materials for kitchen utensils and enables excellent cooking on all types of heat sources - oven, induction hob, glass ceramic, gas, barbecue, traditional cookers. Any type of heat source - oven, induction hob, ceramic glass, gas, barbecue, traditional cookers.

Cast iron is particularly suited to storing heat and holding it for a long period of time and distributes it slowly and evenly, preserving all the nutritional qualities of heat-sensitive foods and optimising the results of flavours and aromas. It even makes it possible to finish cooking while the fire is out or even at the table, keeping the food warm and saving energy.

## **CERTIFIED RODUCTS**

*Eating well is important. So is cooking with safe products. We are very careful about this and carry out many checks on both cast iron and enamel.*

*All pots, pans and plates are enamelled to strict standards and comply with DIN EN ISO 4531 of 2018-09 which certifies the limits of metal ions from food contact articles.*

A high-angle, top-down photograph of a group of people, mostly women, gathered around a large, round table. They are in a dimly lit setting, possibly outdoors at night, with warm, glowing lights (candles or small lamps) scattered on the table. The table is laden with various dishes, including bowls of food, plates, and glasses. Several people have their arms raised, holding glasses as if in a toast. The overall atmosphere is warm and social. The background shows a stone wall and wooden chairs.
